## WM. SPACKMAN MEETS TRAGIC DEATH

Mr. Wm. Spackman Sr. of Stirling was fatally injured when his car was struck by a street car last Sunday on a crowded Salt Lake street.

Mr. Spackman accompanied by a sister had just returned from a trip to California. While driving along on the busy thoroughfare in Salt Lake City they were stopped by the traffic officer, together with two other cars, directly over the street car track. The motorman in the street car was evidently unable to control it and smashed into the Mr. Spackman's car throwing it over the second car parked on the track. Mr. Spackman was thrown violently onto the cement on his head. He was rushed to a hospital where he lived for two hours. Mr. Spackman's sister was seriously shaken but suffered no great injury.

Mr. and Mrs. T. A. Spackman left on Monday for Salt Lake City. Further particulars are not known. Mr. T. A. Spackman is the son of the deceased.

### NANCY CARROLL SINGS, DANCES

Nancy Carroll, the popular Paramount player who essays the role of Rosemary in the pieturization of Anne Nichols' "Abies Irish Rose" coming to the Capitol Theatre next Thurs. Fri. and Saturday will be heard singing the theme song "Rosemary" in the picture. By virtue of the film being synchronized with Quality sound and talking, audiences are given the opportunity to witness an exceptional performance.

Miss Carroll is a product of the stage. Before she entered motion pictures, she appeared in several stage productions in New York where she danced and sang her way to recognition. Going to California as the "lead" in a New York production she was given an opportunity to work in motion pictures. Her versatile ability gave her the prize role of the year in "Abie."

Not only will the audience hear her sing two Irish songs, but they will have an opportunity to see and hear her go through a waltz clog routine. The taps are distinct and give an added thrill to the sequence.

Included in the stellar cast is Paramount star, who essays the role of Abie. Rogers rise to cinematic fame has been nothing short of sensational. A little over two years ago the star was totally unknown, and at the present time Rogers receives more "fan" mail than any other male star in motion pictures, a sure sign of movie fan acclaim.

Another player of stellar proportions is Gene Herholt who plays the part of Solomon Levy, Abie's father. His dramatic characterization is said to be one of the finest performances ever given by a screen actor.

Others in the cast include J. Farrell MacDonald, Camille Pratal, Nick Cogley, Ida Cramer and Bernard Gorcey among others. The film was directed by Victor Fleming, the "hit" director of Hollywood.

### HOME COMING PARTY FOR MISS PAULINE REDD TO BE GIVEN APR. 16

A home coming party for Miss Pauline Redd, who is expected home this week after a two years absence mission, will be given at the High School Tuesday April 16th.

The following program will be rendered after which a dance will be given.

Bishop Allen will give the welcome home address, solo by Deal Mendenhall, piano duet Mrs. Ethel Tolles-trup and Opel Wiggle; vocal duet Mr. and Mrs. Myron Holmes; male quartett; reading by Mrs. Emma Peterson and an instrumental number by the Laycock brothers. All are invited.

### A FEW HINTS ON THE ARRIVAL OF BABY CHICKS

When your baby chicks arrive, be sure to have a comfortable home prepared for them. The lid of the chick box acts as a brooder and should be kept on until you have your brooder ready for them or give them to broody hens. Most farm folks have a brooder house 10 x 10 feet. This will accommodate 200 to 500 chicks with a coal burning Colony Brooder Stove to mother them. The brooder should be tested and operated several days before the chicks arrive. The temperature of the brooder for the first week should be 95 degrees; second week 90 degrees; third week 85 degrees. The temperature of the brooder house five feet from the floor should be 65 to 70 degrees. Once you have raised chicks with a brooder you will lose all your desire to use broody hens. Give baby chicks water with the chill removed. Feed all the buttermilk they will drink, have plenty of small chick grit, oyster shell and charcoal in hoppers for them. Feed a baby chick food of 50 percent fine oatmeal or well mixed commercial chick food. Hopper feeding is a sanitary practice and is especially valuable in preventing disease. Feed chicks what they can consume in 15 or 20 minutes, then remove what is left and feed four or five times a day. Chicks grow when they are consuming the maximum of feed and they will only do this when they are hungry between feedings. Feed all the grain in a litter of clover or straw. Green feed should be given at noon. Lettuce or chopped dandelions are very good. A good thing is to give the chicks a warm mash at noon of equal parts of shorts, crushed oats Victory meal and cornmeal, a pinch of salt and pepper to flavor. Also mix with same your clean table scraps. Cod Liver Oil in the chicks mash is essential during cold weather or dull days; it develops bone, muscle plumage and keeps chicks supplied with the necessary vitamins. For chicks up to one month, use one ounce in ten pounds of dry mash; for older chicks and hens, two ounces in ten pounds of dry mash.

Water dishes of founts should be washed every day. Keep chicks warm and dry, change the litter often, especially if you have a large number to gether. Protect chicks against colds and draught.

### PARK HENS AT HOME

or laid waste a promising crop of hoes a neighbor's White Shorthorn Pullet or Jersey Red Rooster has wrought havoc in their pansy beds or laid waste a promising crop of tender lettuce or luscious peas. When I say "Why not kill off a few—fried chicken is sure fine, and even roast hen is nourishing," they reply that otherwise the owners of these Bolsheviks are my neighbors, and they hate to have trouble with them.

Now friends, listen! You have my permission to keep all the chickens you wish—but please park them on your own lot. Look to your fences. If clipping one wing does not suffice, try clipping the tail—close behind the ears. There, I knew you meant alright, but have been careless. Glad you see the point. In behalf of your neighbor, I thank you.

### BABY BEEF BRINGS RECORD PRICE

A record price was established at the Calgary Spring Show during the past week when the first prize calf in the Boy's and Girls' Calf Feeding competition sold for three dollars a pound. This calf an Aberdeen Angus, shown by Harold Richardson of Bowden, was an outstanding winner in its class. It was purchased by Mrs. Hind of Hind's Meat Market Calgary, and at a weight of 940 pounds, brought its young owner the handsome return of \$2,820.

## Local Golf Club Reorganizes

A golf meeting was held last Sunday and Golf club reorganized. Mayor P. W. Cope was elected honorary president. Mr. C. C. Watson, president, Mr. H. Hodge, vice-president, T. L. Halpin, secretary-treasurer. An executive was elected with the following members: Dr. G. W. Leech, Mrs. H. Hodge S. B. Card, A. H. Zabriskie, Floyd Lamb. Fees this year will be set at \$5.00 for a double membership, \$2.00 for single ladies and school children. A committee has been appointed and they will commence at once to put the course in shape for the season. The Club plan to purchase a large horse drawn lawn mower this year and the course will be kept in number one shape.

### YOUNG ORATORS ENTER FINAL CONTEST

Gwen Gant, age 17, of Grande Prairie and Walter MacDonald, age 18, of Red Deer were selected as the winners for Northern Alberta and Southern Alberta respectively in the finals of the Alberta division of the Canadian contest recently. These two winners will later contend for the privilege of representing Alberta in the Dominion finals to be held at Toronto onto, following which the Canadian champion will compete for International honours at Washington.

She: "They tell me you love music." He: "Yes but never mind keep on playing."

## Rayo Woolf Elected Baseball Manager

At an open meeting for the purpose of organizing baseball for the coming season, Rayo Woolf was chosen to pilot the Sugar City nine this year.

Much enthusiasm was expressed and a "twilight" league organized to get the boys out to develop material to choose a team from. This league is composed of four teams, The Business Men, captained by Frank Leavitt, the Sugar Factory crew, captained by Ross Humphreys, the Farmers with Harry Fairbanks as captain and the High School team under Kenneth Allred. The opening game of this league will be next Wednesday. The question of whether the games should be played at memorial park or a new diamond built at Victoria Park was discussed. This was left in the hands of a committee.

With the material that was used in last year's team and with Kenneth Allred added to the pitching staff, Raymond will be able to field a team this year second to none in the league.

Mrs. G. W. Gordon and family of Penticton B. C. has had an enjoyable visit in Raymond this Easter with her parents Mr. and Mrs. C. Huddle and Mrs. C. Winters.

"I sent this magazine two poems and they sent me back three."

"I will let you have the picture at half the catalogue price." "How much is the catalogue?"

## Queen City's Crown

A year ago there was a great hole, nearly a city block in area, facing the Union Station at Toronto. Down in the bottom, half a dozen cranes were busy sorting huge pieces of steel which were being noisily rivetted as they were set, mecano like, into position.

On that site today stands the tallest building in the British Empire, the magnificent Royal York Hotel which, in two months more, will open the doors to its thousand rooms and welcome its first guests.

Remarkable as has been the speed with which this great Canadian Pacific Hotel has been erected, still more extraordinary to the man on the street must be the tremendous thought which went into the planning of what will be the most up-to-date institution of its kind in the world and in the working out of those arrangements that will ensure its guests the utmost in facilities and service. There will be, for instance, radio outlets in every room, and in the concert hall, Banquet hall and Ballroom, which have seating capacity for nearly seven thousand people, the most modern means of amplification have been installed to provide, not only that speakers and artists and musicians be thoroughly heard wherever they are speak-

ing but, by connection through the radio room, in any other portion of the building. There is provision also for television, should this be developed, for moving picture and movietone projection.

With its own power plant and water-works, its emergency hospital and internal and outside transportation and communication systems, the Royal York Hotel is a complete city. It has its bank and brokers offices, its stores and shops, its community hall and recreation centres. Nothing which a progressive town might have has not been thought of and incorporated to advantage. Down in the basement is a complete printing establishment, a linotype and three presses.

With a tunnel entrance from Union Station, at the junction of all roads into the city, in the heart of "downtown" the site of the Royal York is strategic. With Lake Ontario before it, it is beautiful. The travelling contingent will join with the citizens of Toronto in their eager anticipation of the opening day in June.

## FARM HAZARDS

Accidents can be prevented. In every cemetery sleep the victims of accidents—men, women, children—taken from active life, leaving broken up homes and dependents without support.

In every hospital suffer the victims of accidents. Thousands of them "took a chance." They pay the rest of their lives.

In every neighborhood are victims of accidents—an eye, a hand or a foot gone—hours of pain—health destroyed—time lost—great expense—the joy of living dimmed. Machinery, animals, carelessly handled, daily take life and property—WE CALL THEM ACCIDENTS.

It's criminal to have a stairway with one step missing. A sprained ankle, broken ribs, broken neck or smashed face may result from such a fall.

Hammers, tools and nails on the steps will throw us—may make life cripples of us. One hours work will make it safe.

A cake of wet soap on the step ladder will throw one as quickly as dynamite. Soapy water also makes it slippery and dangerous.

There's no need of climbing onto wobbly and dangerous things—there's a way to climb solid—think it over.

Have strong ladders. Take care of them. Paint them. Discard them the minute they are not safe.

Old home-made ladders, with the

rungs nailed on have let thousands of people down with a whack.

Heavy picture may fall off the walls if not securely fastened. Rolling things will fall from the mantel or table onto baby's head. Let's look over our own premises and see how many dangerous things we can fix.

Have every hammering tool on the place solid on the handle. Today is the best day to fix them.

The old habits of "putting it off" and "taking a chance" furnish the grave digger employment.

There are 1,000 chances to get lock-jaw or an eye stabbed out in a yard of rusty trash to one in a yard of clean sod.

Getting rid of trash gets rid of trouble.

Think before tossing a fork. Think before leaving a fork in the hay or anywhere.

It takes years to raise a man; you can kill him in a minute.

It's an awful botch of economy trying to save by not paying for insurance.

from a

The above extracts were taken from a book distributed by the Bank of Montreal and copies of same may be secured by asking for them. This book is full of interesting facts along the lines of accident prevention and should be read by everyone in every community.

### THE NEW PASTIME IS HOME GARDENING

EVERYWHERE we look we see evidence of the great desire for beautiful home surroundings that is sweeping the country. The editors of our great news papers and magazines, whose fingers are ever on the public pulse, are fully conscious of this trend and are devoting ever increasing space to the subject of home grounds.

As a result, the eyes of the Canadian people are being directed, as never before, to their homes and surroundings; and a new interest is being taken in the fascinating pastime of beautifying the home.

Few things pay such great continuous dividends of genuine satisfaction as well planted home grounds. There is the joy of creating beauty, the knowledge that the appearance of your home place is such that it will bear inspection of friends, neighbors and passers by. Moreover there is a tremendous satisfaction in knowing that your grounds give unmistakable evidence of good taste, culture and refinement. These together with the joy of living among beautiful surroundings, repay you a hundred fold for the small investment of money and time required.

Let Your Children Grow Up Among Beautiful Growing Things

In the home blessed with children, beautiful surroundings are more than a pleasure—they are a necessity. Every one recognizes the important part environment plays in shaping the character of a child. Lucky the child who passed through the impressionable years of his life amid the beauty of trees, plants, flowers and other growing things. He is instilled with an appreciation of the beautiful and better things of life in a manner that will leave an indelible stamp upon his character.

### A Thrilling Hobby

You'll find pleasure and health in your garden. The pleasure of planning the fun of actual planting, the interest of caring for and watching each step in the development of your trees, shrubs and flowers. The first green sign that Mother Nature is smiling upon your effort! These bring a thrill not to be found in any other activity. And the hours spent in the open air and sunshine will each contribute its full share to your health and happiness. Every household-er should join this movement to beautify the homes of our country. He owes it to himself, to his family, friends

and neighbors and to the community of which he is a part.

It is interesting to know that in from well planted homes, every tree hedger plant and vine you plant adds far more to the value of your property than its cost. In fact you are actually paid for making your home attractive, not alone by the added pleasure and satisfaction of living in cheerful surroundings, but in actual dollars and cents. By making your property more attractive you make it more valuable. So you see instead of being an expense, it actually pays you to plant your grounds. Planting is a sound investment yielding continuous dividends.

### GARDEN TROUBLES

One day out in the garden, the Potatoe saw with his own eyes Tom. A. To making love to Lima Bean. She was a tall maiden of the clinging vine type, the kind who needs some one to lean on. The corn had his ears open, and he could hear them plain as could be, and thought to himself that she had Butter Bean his sweetheart, for he could support her better. The Cabbage shook his head when he heard about it, and nearly burst with laughter, the Beet got red in the face, the Radish was hot as popper, the Spinach turned green with envy and the Celery became blanched, for she would not look at any of them. "Let her Turnip her nose if she wants to," said the Pumpkin; "I'll make a face a ther on Halloween." She told him cool as a Cucumber that she'd Squash him good and hard if he did. He was so Cross-fallen he could not reply. The Onion did her best to help him have a good cry. The Sage remarked "Let-tuce keep quiet; she'll come down off her high horse before long, and we shall then have Peas in the garden." "I suppose I may as well," he replied, "Wo cantaloup, anyway."

### "BETTER SEED CAMPAIGN" SUCCESSFUL

General satisfaction is expressed throughout the province with the results of the campaign to promote the use of better seed grain recently carried on under the direction of the department of Agriculture. A marked improvement in the quality of seed used last year was noted as the results of a similar campaign and it is hoped that a corresponding improvement will be apparent in the 1929 crop.

Every package of Red Rose Tea is prepared with the same care—as if our reputation were to stand or fall upon that single package.

# RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good  
In the best package—Clean, bright aluminum

## The West's Ocean Port

Announcement that the rails of the Hudson Bay Railway had reached Churchill on Good Friday, is the most welcome news the people of Western Canada have received for some time, heralding, as it did, the realization of a long entertained hope. For many years Western Canada agitated for the building of a railway to the Bay. It was vigorous, even violently, opposed by Eastern Canada interests, and, politically speaking, the voice of the West was weak in comparison to that of the East. The West, however, kept up its campaign of education as to the merits and feasibility of the route, and ultimately all political parties in Canada became committed to the project.

Finally, plans for a Hudson Bay Railway assumed definite shape in 1910, when a branch line of the Canadian Northern was completed from Hudson Bay Junction, Sask., to The Pas, Manitoba, and the building of a Government line from The Pas to Hudson Bay was authorized by Parliament. Work commenced the following year with Churchill as the objective.

Following a change of Administration at Ottawa, Churchill was abandoned as the proposed terminal, and Port Nelson chosen. The location of the railroad was accordingly altered. The right-of-way was cleared and graded to Port Nelson and steel laid, before the end of 1916, as far as Kettle Rapids, 332 miles from The Pas.

Owing to the war and consequent lack of men and steel, operations were suspended and for some years only part of the completed railway was kept in repair.

The work thus commenced by the Liberals in 1910 was continued by the Conservatives until war, and the after-war period of financial depression stopped the work. The work, however, had only been carried on in a more or less half-hearted manner with the result that progress was slow, and the country, as a whole, lacked confidence in the undertaking, the East regarding it as a waste of public money and in the nature of a political sop to the West.

With the acceptance by Hon. C. A. Dunning of the portfolio of railways in the Mackenzie King Government, a marked change took place. It is an open secret that Mr. Dunning made the immediate and vigorous construction of the road a condition of his entry into the Government. He frankly told the people of the West that he regarded it as "his job" to complete the railway in the shortest possible space of time.

The task of reconditioning the roadbed which had fallen into disrepair was begun, and in view of divergent views which prevailed as to the relative merits of Churchill and Nelson as terminal harbors, Mr. Dunning secured the services of the most eminent British harbor engineer to decide the question. He reported strongly in favor of Churchill, and his report was immediately accepted, and the road again diverted in that direction.

Since then there has been no let-up in construction. It has been pushed forward day and night, in season and out of season, with the gratifying result announced on Good Friday.

In the meantime Mr. Dunning grappled with the problem of building an effective harbor at Churchill and establishing the feasibility of the ocean route through Hudson Straits. Airplane and other surveys, radio, and every modern invention was called into use, and in two years public opinion in the West was not only justified, but the East was largely converted, especially as huge and very valuable mineral discoveries in the northland made accessible by the railway quickly followed.

Although both steel and telegraph have reached Churchill it will require some months yet to fully ballast the road to make it capable of efficiently handling trains. There is an enormous amount of work to be done to build necessary harbor facilities at Churchill. That work is in progress and being prosecuted with the same vigor as characterized the building of the railway in the last three years. Hundreds of carloads of supplies, material and equipment for the harbor are even now distributed along the railway to be rushed in at once now that the rails have been laid.

It is confidently anticipated that before the end of 1929 freight will be moving steadily from the prairies to the West's own ocean port at Churchill, and Mr. Dunning has already announced that the Crow's Nest Pass schedule of rates en grain will apply to the Hudson Bay route.

The new route will, it is believed, effect a veritable revolution in Western transportation. In preparation for it both of our great railway systems have been building north and south lines within recent years, whereas formerly their policy was to so construct lines as to move everything from east to west and west to east.

With the completion of the Hudson Bay Railway one of Canada's ambitions is being realized. It is in these Western Provinces that it is to be given to the Dominion, something it has lacked since Confederation brought a Dominion into existence consisting of a long narrow strip extending from the Atlantic to the Pacific just north of the International boundary line.

## Big Amount For Research

### Ontario Government Increasing the Contribution For This Purpose

In conformity with the Ontario Government's offer "dollar for dollar" plan of assistance for industrial research in the province of Ontario, a bill has been introduced in the Legislature increasing the contribution of the provincial government to the Ontario Industrial Research Foundation from \$1,000,000, as provided in the 1928 act, to \$2,500,000.

Last year legislation was provided for the subscribing by the Ontario government of \$1,000,000 if the same amount were subscribed by private interests. So enthusiastic was the response that that amount has

been over-subscribed and this amendment provides for its increase to \$2,500,000, to be granted on the same terms.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

### Gold Fish Not So Delicate

Only temporary suspension of the activities of a bowl of gold fish resulted from the temperature dropped to 14 degrees above zero and the fish were encased in a solid block of ice. They resumed their activity when the ice thawed. The temperature was the lowest in Marshfield at any time in the last twenty-five years.

### Average Farm Wages

According to a statement issued by the Department of Trade and Commerce of the Dominion Government, the average farm wages paid in Alberta were \$72 per month, which is the second highest average in Western Canada, British Columbia being rated at \$77 per month.

In England nearly 5,000,000 items of correspondence for places abroad are posted annually with insufficient postage and over \$200,000 a year is collected in surcharges from the addressees.

## Armament Reduction

### Great Britain Is Leading the World In This Connection

Right Hon. W. C. Bridgeman's speech of the other day, to which we have already referred, was noteworthy, among other things, for how it indicates how the cost of British naval maintenance is being lessened. Before the War, the First Lord of the Admiralty pointed out, Britain had 114 cruisers. Today she has only 52. Before the War the naval estimates amounted to 24.5 per cent. of the entire national budget. Today they are only 6.9 per cent.

Facts and figures like these speak for themselves. They cannot be given any meaning other than that which they obviously bear. Anglophobes in the United States will probably find them a bitter pill to swallow. But fair-minded Americans will see in them one of the real guarantees of world peace. A nation that is building for war with an eye on imminent hostilities, would not do as Britain has done. Britain leads the world today in the move for naval disarmament, as she has always done.—Regina Leader.

## A TIRED FEELING IN SPRINGTIME

Not Sick, But Not Up To The Mark—You Need The Help Of That Sterling Tonic, Dr. Williams' Pink Pills—They Give New Vitality.

With the passing of winter many people feel weak, depressed and easily tired. The body lacks the vital force and energy pure blood alone can give. In a word, while not exactly sick, the indoor life of winter has left its mark upon them. A blood-building, nerve-restoring tonic is needed to give renewed health and energy. Dr. Williams' Pink Pills are an all-round blood builder and nerve tonic but are especially useful in the spring. Every dose helps to make new, rich, red blood and with this new blood returning strength, cheerfulness and good health quickly follow.

If you are pale, easily tired, or breathless at the least exertion, if your complexion is poor or you are troubled with pimples or eruptions, Dr. Williams' Pink Pills are just what you need to put you right. If you have twinges of rheumatism, are subject to headaches and backaches, if you are irritable and nervous, if your sleep does not refresh you, or your appetite is poor, you need the treatment Dr. Williams' Pink Pills alone can give—you need the new blood, new strength and new energy this medicine always brings. Mr. A. Marcotte, North Han, Que., writes:—"I have found great benefit from the use of Dr. Williams' Pink Pills. Before I began using them I was in a badly run-down condition, and at times felt scarcely able to work. Dr. Williams' Pink Pills have changed all this and since taking them I am enjoying the best of health. Every man who feels run-down and easily tired should give this great medicine a fair trial."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50c. a box from the Dr. Williams' Medicine Co., Brockville, Ont.

### Hungarian Beggars Taxed

Beggars must pay taxes on their incomes, the Hungarian Government has ruled, following an investigation which proved that beggars often made more money than working men. An organization of mendicants has been ordered disbanded.

### Use Minard's Liniment for the Flu.

### Live Stock Held By Indians

Holdings of farm live stock by Indians on reserves in Canada during 1928 were as follows: horses, 36,172; milch cows, 9,194; other cattle, 34,495; sheep, 3,204; swine, 9,704; hens and chickens, 108,918; turkeys, 7,715; geese, 5,196; ducks, 7,768.

## MOTHER OF TWIN'S HELPED

Restored to Health by Taking Lydia E. Pinkham's Vegetable Compound

Mitchell, Ont.—"I had little twin babies and for quite a while after I was so weak I could not do my work because of pains all the way up my legs at the back. I also had headaches and got very little sleep. I took Lydia E. Pinkham's Vegetable Compound, and soon I was able to get up and do my work. I have taken three bottles and I am fine, do my work without trouble and am gaining in weight and strength. I will gladly recommend the Vegetable Compound to anyone."—Mrs. F. STATION, Box 220, Mitchell, Ont.

## For Trans-Siberian Railway

### Heavy Shipment Of Railway Material To Leave Vancouver For Russia

Thirty thousand tons of railway material—trucks and steel framing for box cars—will shortly leave Vancouver for the Orient, as equipment for the Trans-Siberian Railway. The order for this material was placed thirteen years ago, but delivery was halted with the outbreak of the Russian Revolution, and the equipment held in the Canadian Pacific Railway's yards at Coquitlam, until conditions for delivery were favorable.

## Sore Corns Drop Off If You USE "Putnam's"

When you notice any sign of callosities on the feet or toes—that's the time to paint on a few drops of PUTNAM'S CORN EXTRACTOR. Do this, and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes. Putnam's will remove it without pain. Insist on PUTNAM'S CORN EXTRACTOR. It does the work—and roots out the corn, quickly and without pain.

## Pensions Act Modified

### Amendments Will Make It Easier For Alberta Cities

Amendments to the Old Age Pensions Act passed before the legislature prorogued, will bring some relief to the cities in connection with the fear that a great number of the old age pensioners will drift from the rural municipalities into the cities.

An amendment to section four provides that any person having been granted a pension whilst resident in a municipality or an improvement district, shall be deemed to continue to be a resident of that district so long as he continues to reside in the province. This was in line with the suggestion of G. H. Webster, Liberal, Calgary.

In connection with the maintenance clause, an amendment was passed providing that no person will be called upon to supply maintenance if his or her earnings are such that they do not come within the scope of the Income Tax Act.

## Recipes For This Week

(By Betty Barclay)

### TWENTY-FIVE CENT PUDDING

- 1 quart water.
- 1 teaspoon salt.
- 1 cup pearl tapioca.
- 1 teaspoon vanilla.
- 4 tablespoons butter.
- 1½ cups brown sugar.

Cook tapioca in water until transparent. Add other ingredients. Bake one-half hour.

### AMBROSIA SOUTHERN STYLE

- ½ lb. shredded cocoanut.
- 4 to 6 oranges.
- 1 to 2 cups pineapple (optional).
- 2 bananas (optional).

Cut sections of oranges into about three pieces, add diced banana and diced or shredded pineapple. Sweeten to taste. Add cocoanut and serve cold. Delightful variations can be made with any seasonable fruit as peaches, pears, cherries and strawberries.

**The Poor Man's Friend.**—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

### The Up-Keep Of Roads

Well-constructed highways are necessary in Canada to meet the insistent demands of traffic, but well-maintained roads are even of more importance in the interest of economy. Consequently, provincial road administrative organs and engineers are devoting a great deal of thought and attention to the care and protection of roads. In 1927, the mileage of roads under maintenance in Canada under the patrol of gang system was 44,416 miles, at a cost of \$18,024,017.

A house built of cellular glass, held together by thin iron plates, has been constructed in Japan by a native scientist. There are no windows; ventilation is provided by valves on the second floor.

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

Alberta's farm workers received higher wages in 1928 than those of any other province in Canada with the exception of British Columbia.

Minard's Liniment for Coughs and Colds.

# Unequalled for Healing Zam-Buk

## Canada's Mineral Industry

### Third In Importance Among the Primary Industries Of the Dominion

Addressing the 30th annual meeting of the Canadian Institute of Mining and Metallurgy in Winnipeg, S. J. Cook, chief of the mining, metallurgical and chemical branch of the Dominion Bureau of Statistics, said that, "Canada's mineral industry, third in importance among the primary industries of the Dominion, brings to the nation a prestige far beyond the monetary measure of the output. First in nickel, first in asbestos, third in gold, third in silver, fourth in lead and copper, and sixth in zinc, among the world's producers, Canada enjoys an enviable position in the mining world with every prospect favorable to continued expansion."

**The Oil For the Farmer.**—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the home.

**Motorist (after knocking over a butcher's boy):** "Are you hurt, my lad?"

**Butcher's Boy (picking up contents of his basket):** "Duuno, here's me liver and ribs, but where's me kidneys?"

## Test Alberta Coal

### Samples Are Taken To England For Laboratory Test

Tests of Alberta coal with a view to the securing of a substitute for anthracite will be made at the Woodall Duckham laboratories in England, so Sir Arthur Duckham announced on route east. He obtained samples for this purpose. He is on his way home from Australia, which he visited on an Empire trade mission.

**A Foo To Asthma.** Give Asthma half a chance and it gains ground rapidly. But give it repeated treatments of Dr. J. D. Kellogg's Asthma Remedy and it will fall back even faster. There is no half way measure about this remedy. It goes right to work and drives asthma out. It reaches the inmost breathing passages and leaves no place for the trouble to lurk. Have it by you for ready use.

### Manitoba Taking Her Place

Manitoba is now experiencing a period of intensive mining development. Copper, gold, silver, lead, zinc and other metallic products have been mined, and exceptional opportunities exist for the prospector and mining company.

### Minard's Liniment prevents Flu.

Ten thousand bushels of Garnet wheat are to be shipped to Britain and other wheat importing countries to be tried out by the millers there.

## YOU CAN'T DYE with Good Intentions

You can get results—after a fashion—with any old dye; but to do work you are proud of takes real aniline. That's why we put them in Diamond Dyes. They contain from three to five times more than other dyes on the market! Cost more to make? Surely. But you get them for the same price as other dyes.

Next time you want to dye, try them. See how easy it is to use them. Then compare the results. Note the absence of that re-dyed look; of streaking or spotting. See that they take none of the life out of the cloth. Observe how the colors keep their brilliance through wear and washing. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. Remember this when you buy. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

# Area Of Land Under Crop In Western Canada Will Be Greatly Enlarged This Season

From the Dominion Bureau of Statistics comes a report upon the acreage of land that has been prepared in the prairie provinces for the growing of crops in 1929. That report shows that approximately 1,100,000 more acres of land are now ready for seeding than had been prepared at this time last year. The report thus suggests that the work of the farmers in western Canada is further advanced than it was at the same date in 1928. The statement of the bureau of statistics adds the information that there has been an increase in new breaking in Manitoba and Alberta and may indicate, by this announcement, that the area of land under crop in the prairie region will be enlarged in 1929. Possibly, then the expansion of the wheat-growing area in western Canada is to be continued this year. To those who look back over the records of progress in agriculture in this country that expansion will seem to have been marvellous. In 1891 the total area of land under wheat in Manitoba and the Northwest Territories was 1,010,433 acres. Ten years later the acreage had grown to 2,495,474. By 1906 the amount of land employed for the cultivation of wheat on the prairie had reached 5,062,493 acres. In 1911 it had almost doubled again and amounted to 9,301,293 acres. In 1921 wheat lands accounted for 22,181,329 acres out of a total of about 37,000,000 acres used for the raising of cereal crops. In 1923 a total of 21,223,448 acres was in wheat and in 1928 approximately 23,000,000 acres.

The expansion of the wheat-growing area in the prairie provinces, of course, has accompanied the increase in population in that part of the dominion. Both settlement and wheat-growing, too, have been stimulated by the development of the Marquis variety of hard spring wheat and, subsequently, of some other strains of wheat suitable for cultivation in the prairie region. The experiments of Dr. William Saunders and his sons, which resulted in the production of the Marquis wheat, were undertaken with the object of making available for farmers on the prairies a good variety of the grain that would mature more rapidly than varieties then in use. The success of those experiments, it has been said, very greatly enlarged the territory in the western half of the dominion with which wheat-growing was practicable. Improvements in farm machinery, the use of tractors to draw plows and binders and, of late, the introduction of combined reapers and threshers have all assisted the western farmers to extend the area of the wheat lands of the prairies. Last year those lands produced Canada's largest wheat crop. While the quantity of that crop was satisfactory, the quality of it was disappointing. The lowering of the grade of the crop was due largely to a factor beyond the control of the farmers, namely, the severe frost in August. While that is so, there have been complaints that in some districts a proportion of unsuitable and even poor varieties of wheat had been sown and it has been reported that in the prairie provinces, as well as in some other provinces, there is need for action to check the spread of noxious weeds. At any rate, discussion of the grading of the great crop of 1928 will emphasize the importance of attention to the quality as well as to the quantity of the wheat grown in Canada.

## Better Turkeys In The West

Association Of Turkey Breeders Formed In Alberta To Help

Breeders of turkeys in the province of Alberta have realized that their industry would be greatly helped by a more general use of larger and better breeding stock. One hundred and fifty breeders of bronze turkeys in the province of Alberta have formed themselves into an association and with the assistance of the Live Stock Branch of the Department of Agriculture, at Ottawa, are having their birds classified according to their quality. Three grades of birds have been decided on and the birds that meet the requirements of the different grades are leg banded accordingly. The highest grade, to be known as "A" grade, are large birds of fine form and plumage, weighing 25 pounds and upwards for young males, and 18 pounds and more for young hens. The second or "B" grade have to weigh at least 23 pounds for the young males and 15 pounds for the young hens. Birds are accepted in the "B" grade even though they show minor defects in plumage and form. The "C" grade birds must be of good type and weigh at least 20 pounds for young males, and 13 pounds for the young hens. The Association have already had 2,356 breeding birds inspected, approved and banded according to the grades to which they belong.

## Game Fish Hatchery

Stocking Alberta's Stream With Trout and Other Game Fish

Plans are under way for a game fish hatchery in the Edmonton district making a total of three in Alberta. The other two are at Banff and Waterton Lake. Each can handle 1,600,000 fry a season. Alberta's streams have been stocked steadily since the war and trout fishing has been greatly improved. Including the Red Deer and north the streams are stocked with Loch Leven and Brown trout, fall spawning species, and south of the Red Deer with cutthroat, rainbow and steelheads, spring spawner.

"You can hunt if you like but you must muzzle your dog."—Moustique, Charleroi.

W. N. U. 1730

## Prairie Tourists To Have Sea Cruise

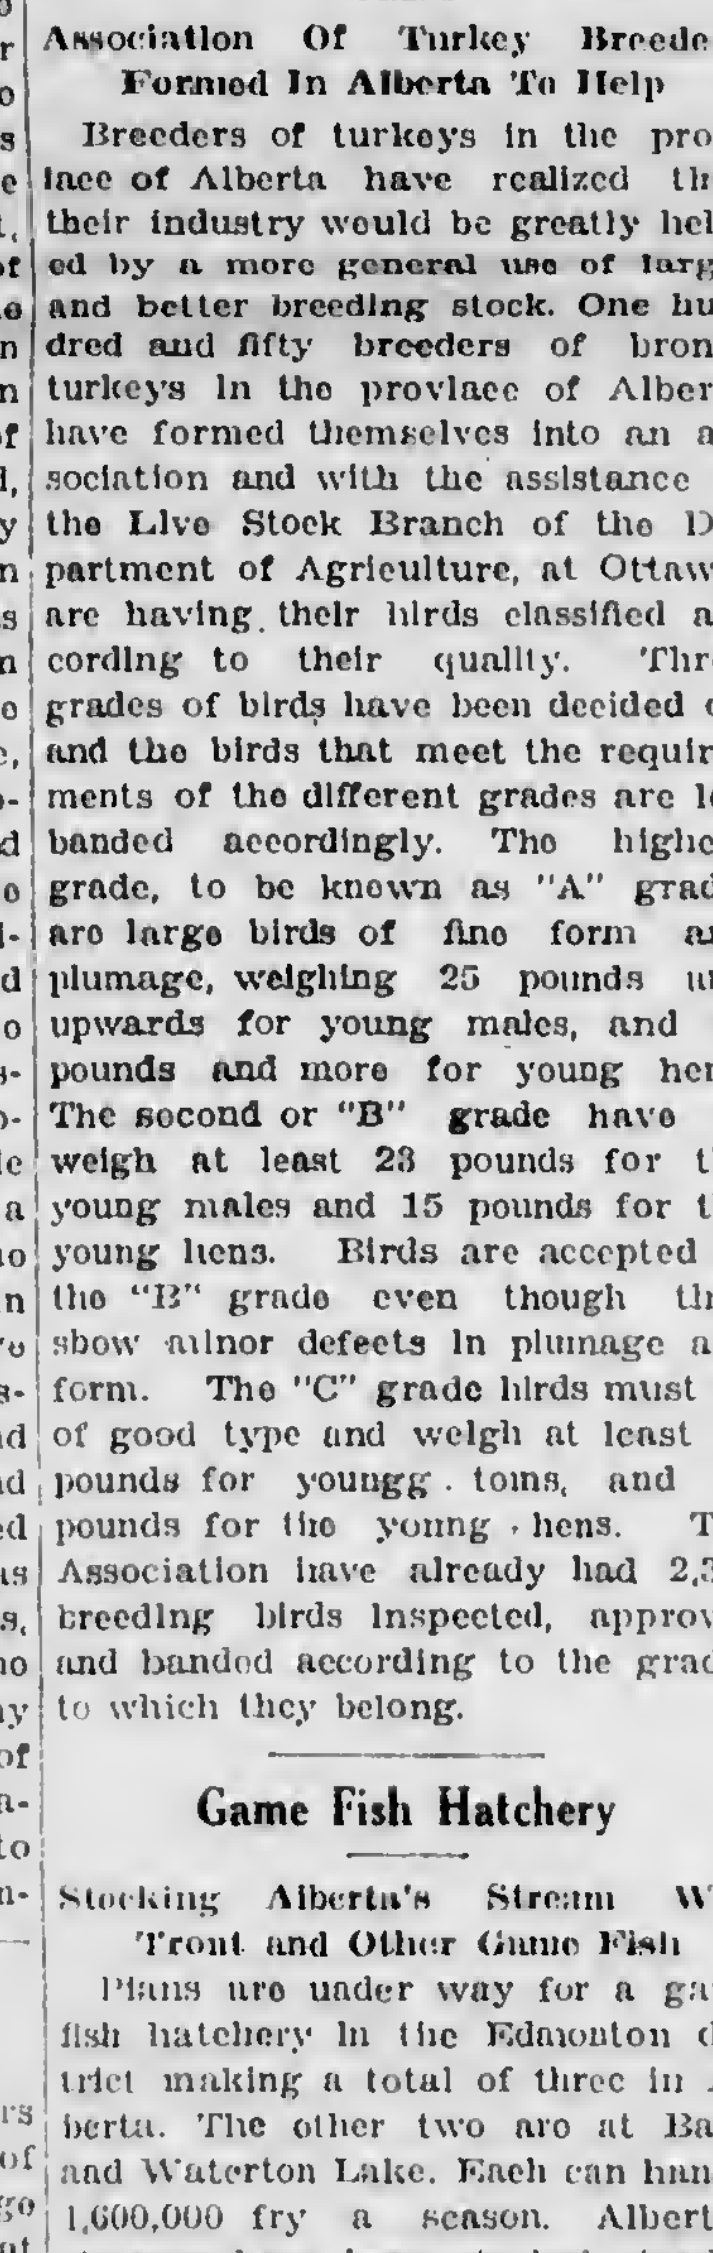

Personally Conducted Tour Arranged By the Canadian National Railways

"Low land and high land and out along the sea." This line of verse applies perfectly to the summer tour which will leave the Canadian National Railways' Station at Winnipeg on July 1. Beginning here, the tour which will be personally conducted, will cross the prairies, Saskatchewan and Edmonton, will tarry in Jasper National Park, will strike north through Prince George to Prince Rupert, and will then drop south by steamship on the Pacific Ocean to Vancouver.

Many reservations have already been made to say nothing of inquiries, and there is evidence enough that this year's tour will be as popular as last summer's.

On the second day out, the travellers will spend the afternoon at Watrous, and will have an opportunity of bathing in Little Manitou Lake, a mineral lake unique in the prairies. They will see Saskatoon and Edmonton and will drive through Watnwright Buffalo Park. After a day at Jasper, seeing the Lodge in the mountains, golfing and motoring or riding the mountain ponies, they will see the supreme Mount Robson, Bulkeley Gale and Canyon—one of Canada's wonders—and they will walk through the fascinating Indian village of Kitwanga, which bristles with totem poles. The trip from the northern port of Prince Rupert to Vancouver, along the placid sheltered sea, will be a pleasure in itself, climaxed by a tour of Vancouver, and then the travellers will be free to go as they please.

## Women Aviators

Must Compete With Men On Equal Terms In Applying For Pilot's License

Where aviation is concerned, women will have to compete with men on equal terms. This is the dictum laid down by the civil aviation branch of the Department of National Defence, on receiving the first application from a woman, seeking a commercial air pilot's certificate.

Women applying for commercial pilot's licenses, it was stated, will be required to come up to the minimum requirements of physical strength and endurance demanded from men before they can fly commercial machines.

This ruling was adopted by the Civil Aviation branch, officials said, out of regard for the safety of the flying public. It was explained that no great confidence would be instilled in passengers who, on reaching an airdrome, were escorted into a 'plane to be flown by a small woman.

In the issuing of private pilot's licenses, a distinction is made between the sexes. A woman private pilot is required to possess only seven-tenths of the physical strength of a man. A woman possessing this strength is regarded as normal, while one possessing the strength necessary to qualify for a commercial pilot's certificate would be regarded as super-normal.

## Miners For Peace River

The personal financing of three hundred British miners, enabling them to locate in the Peace River country, is the intention attributed to Lord Weir, of Rousherville, who was in Ottawa recently. Any scheme of migration would be preceded, of course, by training to adapt the new settlers to an agricultural life.

Brady: "How did your automobile accident happen?"

Holmes: "Too many turns."

Brady: "Yes?"

Holmes: The road turned right, I turned left and the car turned turtle!"

## An Important Industry

Flour and Grist-Milling Is Canada's Second Most Important Manufacturing Industry

The value of production in Canada's flour and grist milling industry has been climbing steadily since 1923, the Canadian Government Bureau of Statistics shows in a recent report on the industry for 1927. The amount of invested capital is also again on the up-grade an increase of over \$3,700,000 being shown.

The gross value of production for the year under review was \$191,731,470 which compares with \$189,580,741 in 1926; and \$154,895,991 in 1923. Flour and grist-milling is Canada's second most important manufacturing industry in point of gross value of production exceeded only by pulp and paper.

## To Manufacture Fertilizer

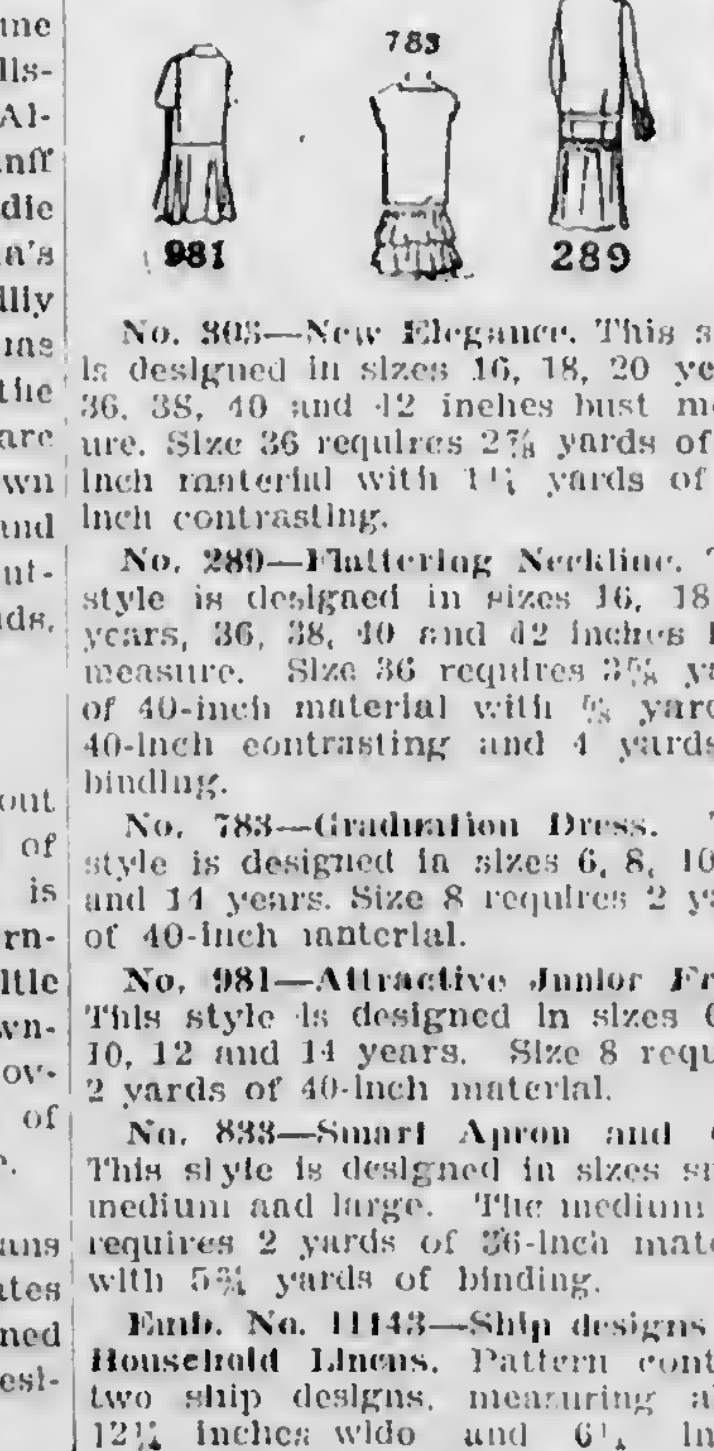

Chemical Fertilizer Factory To Be Established At Saskatoon

Arrangements have been completed here for the establishment in Saskatoon of a \$750,000 chemical fertilizer factory. It will manufacture chemical fertilizers sulphuric acid, weed killer, sprays and other heavy chemicals. One of the products will be superphosphate fertilizer and it is stated that for its manufacture phosphate rock will be secured from the Banff district in Alberta, and from parts of the state of Montana.

## Canada's Mining Industry

The variety of Canada's mineral deposits, the large scale on which operations are conducted, and the great extent of its mining lands, make it evident that the Dominion is a country of great mineral possibilities, that it is undergoing rapid development, and that it offers an attractive field for exploration and development companies.

## Safeguarding The Health Of The Rural Population By The County Health Unit System

### More Room At Jasper Lodge

Increased Accommodation Provided For Mountain Hotel

So great has been the demand for accommodation at Jasper Park Lodge, the Canadian National Railways' summer hotel in the Rocky Mountains, that increased accommodation has been found necessary in order to care for the number of guests desiring to visit Jasper National Park, which is Canada's largest mountain park and game sanctuary, it was stated today by A. S. McLean, general superintendent of Canadian National hotels. To provide for the demand for further accommodation, eight new buildings are now in course of erection, the contract for these having been awarded to H. G. MacDonald and Co., of Edmonton, who now have a gang of men at work.

Last year a separate house-keeping cabin for the use of parties desiring to visit Jasper Park accompanied by their families, and taking with them their own staff of servants, was erected, and this was found so popular that another house-keeping cabin, similar to the first, is being erected. In addition, there will this year be four new four-room cabins, each room having private bath and with two sitting-rooms in each cabin. There are also being erected for the 1929 season, three 10-room cabins, each room having private bath and each cabin having a sitting-room. The new cabins are of log and native boulder construction, in harmony with the other buildings which comprise Jasper Park Lodge, and their erection will give accommodation for 550 persons, by the opening of the Lodge on May 21st, this year. In 1927 more than 400 persons were turned away owing to insufficient space to provide for their accommodation at the Lodge, and last year, despite increased space provided, the Lodge was unable to care for more than 200 applicants for rooms.

### Have Revised Grade Standards For Barley

Two-Rowed and Six-Rowed Types Must Be Separated

Approval to new grade standards for barley is given by the committee on agriculture and colonization, of the House of Commons. The new standards provide for the separation of the two-rowed types. It was pointed out that the increasing demand for Canadian barley for malting purposes rendered the changes necessary.

Dr. L. H. Newman, of the cereal division of the department of agriculture, said that in the last eight years the Canadian barley crop had doubled. The last crop year 26,000,000 bushels were exported. The estimated crop this year was 111,000,000 bushels. Of the total exports, sixty per cent. went to the United Kingdom and there was an increasing demand in Germany.

Under present grade standards two-rowed and six-rowed barley were mixed. It was desirable that the new standards be set that would keep the two types separate. The maltster would then know exactly what he was buying for his particular purpose.

### Most Empire Colonies Are Not Profitable

But Those Belonging To Britain Are An Exception

With the exception of England's far-flung Empire, and of the Dutch islands in the East Indies, colonies have so far failed to be as profitable as had been hoped. In 1912 only about one-half of 1 per cent. of Germany's imports come from her colonies. Of her exports, only seven-tenths of 1 per cent. was taken by the colonies. Even the Belgian Congo in that year furnished Belgium only 1 per cent. of that nation's imports. It is doubtful, therefore, whether Germany today would derive much economic advantage from regaining her old colonies. That they would be of little value to her as reservoirs for surplus population may be judged from the unwillingness of the Germans before the war to emigrate to the colonies.—New York Times.

The ancients knew nothing of life in apartments, but found got the same general effect.

### How To Order Patterns

China has a population of more than 357,000,000.

### That Canada's present system for safe guarding the health of her rural and small-town citizens is inadequate, and should be replaced by the "County Health Unit" system, is the contention of five outstanding public health authorities representing four provinces, who write in the current issue of the "Canadian Public Health Journal."

From Regina, Dr. F. C. Middleton, D.P.H., Acting Deputy Minister, Department of Health writes to shatter the illusion that the country is a healthier place than the city. He quotes very complete American statistics to prove that the rural death rate is higher than the death rate in big cities. The most probable explanation he suggests, is that "there is a more effective, continuous and organized protection of health in cities than in rural districts." He characterizes the County Health Unit as the "greatest single medium for the advancement of public health today" and adds that Saskatchewan is "hoping to have at least four of these full-time health districts in operation this year, and our objective will not be reached until there are at least 25 established."

Dr. Alphonse Lessard, Director, and Dr. Emile Nadeau, Assistant Director of the Quebec Provincial Bureau of Health, write as follows.

"What is the 'County Health Unit' system which we are operating in our Province of Quebec? It consists in the establishment, in a county or in two small neighboring counties, of what might be designated as a 'Bureau of Health in Miniature,' composed of a full-time medical officer, two or more public health nurses, a sanitary inspector and a secretary. The whole population of the county is thus submitted to constant supervision on the part of this staff."

"In the counties where health units have been in operation for a period of two or three years, the general death rate has been reduced, and especially the infant mortality rate and the death rate from contagious and infectious diseases, with also a marked reduction in the number of cases."

How one community saved a \$6,000 hospital fee is told by H. E. Young, M.D., LL.D., Provincial Health Officer, British Columbia.

"In the year previous to the opening of our first medical unit, the district in which it was situated had paid \$6,200.00 to the Isolation Hospital for cases that had been sent into it," he writes.

"The following year, 1923, under exactly the same local conditions but with a full-time medical health officer in charge with a staff of four nurses and a sanitary inspector, we were able to reduce the Isolation Hospital charge to less than \$100.00. This was an argument that appealed directly to the municipal council."

Touching upon the matter of finance, Dr. Young writes: "I would urge the serious consideration of the resolution passed by the Dominion Council of Health, 'Resolved that the Dominion Government be respectfully requested to further the establishment of 'Full-time Health Units' by the voting of an annual grant of money for this purpose."

"The part-time medical officer of health has been to a large extent a failure," writes Dr. J. W. S. McCullough C.M., D.P.H., Chief Inspector, Department of Health, Ontario. Yet at the present time, fully 99 per cent. of Canadian municipalities leave their health in the hands of part-time medical health officers.

"The County Health Unit is bound to come," he adds the question is how soon?"

Fanner Brown—What's your son Hiram doing in the big city these days?

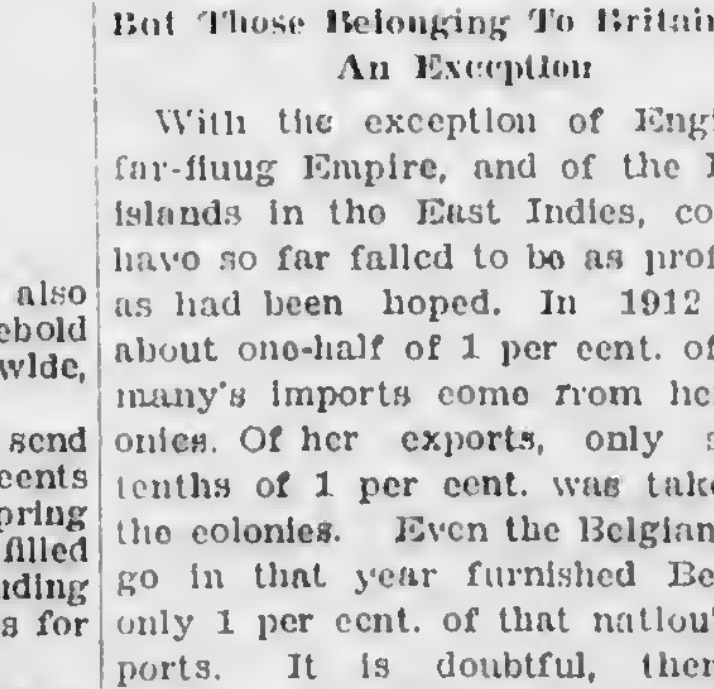

Fanner Green—Studying for a doctor.

Fanner Brown—What's the matter? Doctor too lazy to study him self?"

Why has a greedy man a short memory?—Because he is always for getting.

## WORLD HAPPENINGS BRIEFLY TOLD

Hon. H. G. Carroll, vice-president of the Quebec Liquor Commission, received official notification that he had been named lieutenant-governor of the province of Quebec.

R. B. Graham, Crown prosecutor in the Winnipeg police court since 1913, has been appointed police magistrate in succession to Sir Hugh John Macdonald, deceased.

Pending the world-wide abolition of slavery and forced labor, victims of the two institutions should at least enjoy the advantages of the eight-hour day, according to the International Labor Bureau at Geneva.

Clad in bright sweaters, knickers and high boots, with pack sacks slung across their backs, Ilda Beaton and Barbara Thorning, two English girls, have set out from Toronto on the first leg of a journey to Vancouver, B.C.

Negotiating a distance equal to that around the world at the equator, 25,000 miles, a motor cycle which carried eight British drivers in relays for 23 days and 22 nights covered the entire distance, 25,190 miles, in 554 hours 8 minutes.

The Manitoba Department of Education has agreed to form a circulating library of professional books for school teachers. By paying the postage on books all teachers in the province will be able to secure this aid in their profession.

Miss Ellen Hemmeon, B.S., of Mount Allison University, Sackville, N.B., won the travelling scholarship awarded annually by the Canadian Federation of University Women for 1929-30. Miss Hemmeon is dean of women, and instructor in the department of French, at Mount Allison.

E. W. Beatty, president of the Canadian Pacific Railways, stated that the Duke of Gloucester, third son of the King, would open the new railway hotel being completed in Toronto, provided he could be in Toronto at that time. The Duke of Gloucester will arrive at Vancouver in June to start a tour.

### New Idea in Surgery

Dr. Karl Hutter, of Vienna, reveals a method of performing a bloodless surgical operation with a needle-shaped electrode, which coagulates and removes diseased tissue without the use of a knife. It has been used so far to remove warts, birthmarks, moles, and the like, but can be used for more serious operations, Hutter said.

### Edmonton's School Enrollment

Edmonton's school enrollment is 14,600, which is more than double the city's entire population twenty-five years ago.

Workman's Wife: "Poor dear! 'E worked 'isself to death! 'Bel'n' so short-sighted 'e wasn't able to see when the foreman wasn't lookin'!"

### Bible Three Centuries Old

Was Used To Swear In New Vice-President Of United States

A most unusual Bible was used to swear in the new Vice-President of the United States, Chas. Curtis, of Kansas. It is the property of E. M. Gels, of Salina, Kansas, and is 350 years old. The Bible has been in the Gels family at least five generations. It was printed in Cologne, Germany, in 1564, and was copyrighted by Emperor Ferdinand. It is bound in wild boar skin with wooden inner covers. The book is printed in two tones, red and black, in clear faced type, and contains many woodcut pictures. One scene shows an angel driving the devil out of Paradise. Satan is shown as a large horned dragon. On the frontispiece, which bears the German imperial seal, are depicted a series of scenes, the first being the medieval artist's conception of the fall of man. Eve is shown handing Adam an apple. The second is of an angel driving the two out of the Garden of Eden.

### FOR MOTHERS OF YOUNG CHILDREN

Mother's are quick to praise anything which brings health and comfort to their little ones—any medicine that will make the baby well and keep him well will always receive hearty recommendation from the mother. That is why Baby's Own Tablets are so popular. Thousands of mothers throughout the country, not only use them for their own little ones but are always delighted to be able to recommend them to other mothers. Thousands of mothers have proved Baby's Own Tablets to be without an equal in relieving their little ones of any of the many minor ailments which arise out of a derangement of the stomach and bowels. Baby's Own Tablets are the ideal laxative—easy to take but thorough in action. They banish constipation and indigestion; break up colds and simple fevers; expel worms and make the teething period easy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Compulsory Insurance**  
Privately owned automobiles will be exempt from compulsory insurance for one year at least in the province of Alberta according to a redraft of the Vehicles and Highway Traffic Act recently distributed to members of the Legislature. Taxicabs and livery cars of all descriptions will be compelled to carry a specific amount of insurance.

### Heart Palpitated Nerves Bothered Her Sleep Was Broken

Mrs. Fred A. Pugsley, East Southampton, N.S., writes:—"I was bothered very much with my nerves and palpitation of the heart, and my sleep was broken at night. I decided to try

and after I had taken six boxes I found that they had done me so much good I will gladly recommend them to all those who are troubled with sleeplessness caused by their heart and nerves."

Price 50c. per box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Very slow plumber: "Oh, I remember your little boy, mum, 'E were in the infants' class when I went to do a job at the school some time ago."

Exasperated Lady: "Indeed. And what class was he in when you'd finished?"

More than \$44,000 of England's citizens received poor relief in September of 1928.

## COULD NOT DO MUCH WORK

Eczema on Face, Neck and Hands. Cuticura Heals.

"Eczema broke out in pimples all over my face, neck, arms and hands. I had to keep my sleeves rolled up so they would not irritate the breaking out on my arms. I was ashamed to go around on account of the eruptions and the irritation was terrible. I could not do much work, and the irritation kept me awake at night. I sent for a free sample of Cuticura Soap and Ointment and it gave relief. I purchased more and in about two weeks I was completely healed." (Signed) Percival S. Pinder, R. R. 6, Lindsay, Ont., Aug. 27, 1928.

Cuticura Talcum, the newest member of the Cuticura family, for the newest member of your family. Soap 25c. Ointment 25c. and 50c. Talcum 25c. Sold everywhere. Sample each free. Address: Cuticura Dept., J. E. Wall Company Limited, Montreal.

### Vancouver Grain Port

Going Ahead With Port Development On a Big Scale

Vancouver is experiencing a movement of grain comparable to that of the rush season. Storage on March 15th was 5,210,193 bushels in Vancouver elevators, with 534 Canadian Pacific cars on spurs, and 663 cars west of Field. There were 15 boats in port with a united capacity of 2,500,000. Lake head storage was 73,479,000 bushels in elevators with an additional \$655,000 in boats for winter storage.

Preparing for continued growth of the westward flow of grain from the Prairie Provinces, Vancouver is going ahead with port development on a big scale.

Cat's-eye is a kind of quartz, much valued as a gem, opalescent, and of various shades.

### Mild Weather Thaws Igloos

Eskimos Are Made Homeless By Action Of the Sun

It might be expected that winter would be winter at Tavane Bay. For Tavane Bay is 250 miles north of Fort Churchill, where the Hudson Bay Railway, through Manitoba's rich northern mineral fields, will end. But the North has been much maligned. Even the Eskimos will tell you that. As usual, this past winter, the Eskimos of Tavane Bay built their igloos, their little round houses of snow and ice. As usual they were buried now and again by blizzards. But quite out of the usual was the thaw which struck them just after Christmas. The temperature soared to 21 degrees above zero. The walls of the igloos collapsed, and dozens of families were made homeless. Yet the Eskimos were cheerful. Their attitude was: "Who said our country was frozen up?" And building materials were cheap. As soon as the weather was normal again, they set to work and rebuilt.

### Empire Marketing Board

Spending Money To Create An Interest In Canadian Farm Products

A bulletin from the Saskatchewan Department of Agriculture draws attention to the fact that Canada is spending money liberally to create an interest in Canadian farm products in the British Isles, and that the Empire Marketing Board, in its turn, is educating the people of the British Isles to purchase Canadian farm products. It points out that the British Empire holds unexcelled opportunities to develop markets within her own borders, and urges the farmers of the West to take advantage of the opportunities thus created to establish a market which will be permanent in character and ultimately more profitable.

## FASHION

No. 259—Parisian Simplicity. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 1/4 yards of 40-inch material with 5/8 yard of 36-inch contrasting.

No. 190—One-Piece Wrap Around. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 2 1/4 yards of 40-inch material with 4 1/4 yards of 36-inch contrasting.

### SUNDAY SCHOOL LESSON

APRIL 14

HEZEKIAH LEADS HIS PEOPLE BACK TO GOD

Golden Text: "Jehovah your God is gracious and merciful." 2 Chronicles 30:9

Lesson: 2 Chronicles 30:1-27.

Devotional Reading: Psalm 145:8-17.

#### Explanations and Comments

Ritual Was Made For Man and Not Man For Ritual, verses 1-4. Nisan, the first month of the Jewish year, corresponding to our month of April, was the regular time for keeping the Passover. In the reign of Hezekiah, however, the Passover could not be kept at that time, because a sufficient number of the priests had not sanctified themselves (had not undergone certain washings, abstinence and forms), nor had the people assembled at Jerusalem owing to the fact that the temple was not cleansed until the sixteenth day of Nisan, and the fourteenth day was the time for beginning the Passover. Accordingly, the King with the princes, and all the assembly in Jerusalem, had taken counsel together and had agreed to keep the Passover in the second month. The law (Numbers 9:10, 11) allowed those who for good reasons were prevented from observing the Passover at the regular time to celebrate it in the second month, and this decision seemed right to the king and the whole assembly.

Dr. Charles Reynolds Brown contrasts Hezekiah's broad-minded action with the narrow scruples of those chief priests and Pharisees who were intent upon putting Christ to death upon the cross at another Passover, and who would not venture into Pilate's judgment hall lest their holy feet should suffer defilement and make them unfit to share in the sacred feast. "No one is entitled to speak with greater authority on the limitations of ritual than a strong advocate of the sanctity of ritual like the Chronicler; and we may well note, as one of the most conspicuous marks of his inspiration, the sanctified common sense shown by his frank and sympathetic record of irregularities of Hezekiah's Passover. It says much for the healthy tone of the temple community in his day that he does not attempt to reconcile the practice of Hezekiah with the law of Moses by any harmonistic quibbles."—W. H. Bennett. "Everything regarding form is elastic in the interests of the soul."—W. L. Watkinson.

#### Escalloped Macaroni With Cheese

1 1/2 cupsful Borden's St. Charles Milk.  
3 cupsful cooked, drained macaroni cut in two-inch lengths.  
1 1/4 cupsful grated American cheese  
1 1/2 tablespoonfuls flour.  
1 1/2 tablespoonfuls butter or butter substitute.  
1/2 teaspoonful salt, scant.  
1/2 teaspoonful pepper.  
Few grains paprika.

Make a white sauce of the flour, butter, seasonings and the milk undiluted. Stir in the macaroni. Thoroughly oil a rather shallow baking dish, put in a layer of the macaroni, then one of the cheese, continuing in this way until all is used and making the last layer one of cheese. Bake in a moderate oven until browned, about thirty-five minutes.

Princess Mary has been elected president of the Yorkshire Beekeepers' Association, stated to be the largest society of the kind in the world.

Young women in Japan are rapidly taking the place of men as elevator operators, as well as in many other positions connected with business and industrial advancement.

There may be splinters in the ladder of success, but you don't notice them unless you're sliding down.

The exact measure of time covered by a day is 23 hours, 56 minutes and 5 seconds.

### Predicts Next War Will Be Sudden

English Professor Says Britain Could Not Wait To Consult Dominions

Great Britain will either lose the next war or lose the Dominions, Brigadier-General J. H. Morgan, K.C., professor of constitutional law at the University of London, said in a lecture at the university.

The next war, he said, might come like a thief in the night and might be fought and won in the course of three weeks. There probably would be no ultimatum to warn of the conflict. No British government, he continued, would be likely to dare to define what was a flagrant violation of right necessitating immediate action without consulting the Dominions.

While the jurists were trying to decide whether there had been a violation of rights and while the parliaments of the Dominions were being summoned, the war would be fought and won, the lecturer declared. The result, he said, would be that if Great Britain stopped to consult the Dominions, she would lose the war, and if she did not consult them, she would lose the Dominions.

Brigadier-General Morgan has had a distinguished military as well as a brilliant academic career.

#### Alberta Wheat Pool Elevators

Fifty-six elevators will be built at as many different points by the Alberta Wheat Pool this year. This will bring its total up to 374 elevators.

#### Calgary's Aero Club

Calgary's Aero Club now has 814 members, of which 145 are taking instruction.

About all you can say for yes-men is that they shorten the jury's deliberations.

## It May Be Urgent

## When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

**Fletcher's  
CASTORIA**

W. N. U. 1780

## When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

## Storms In Ontario Cause Great Damage And Loss Of Life

Toronto.—Swept for two days by the worst series of April storms on record, the citizens of a great section of Ontario counted the damage done, and worked to restore essential services. The storm left in its wake damages estimated at more than a million dollars, a toll of eight known dead, disrupted rail and highway traffic and isolated communities.

Following is the list of victims reported: Jack Burman, Stratford, drowned when his boat capsized in the flood-swollen Maitland River. Walter Northrop and Helen Wright, Peterboro, drowned when their automobile went through a washed-out bridge at Harmony.

Jack Miller, Scarborough, drowned when his truck went through a bridge spanning the Rouge River.

Orton Cook, Barrie, drowned when a dam collapsed.

Henry Taylor, Walkerton, drowned in the Saugeen River.

J. Kennedy, Toronto, and Robert Milne, Belleville, killed in two separate railway accidents caused by flood waters.

In the Allandale division of the Canadian National Railways there were 22 washouts. Stratford and Belleville sub-divisions were hard hit. Altogether, on both lines, more than fifty washouts are reported.

Bridges swept away have cut off highways. Damage on the Kingston Road has isolated the whole of eastern Ontario from Toronto by road. Markham Township reported many bridges out. The whole valley of the Saugeen River is menaced by rising waters. In Bentick Township, South Grey, fifty bridges have been swept away and a dozen dams washed out.

Scores of small industries are crippled by the general destruction of dams and factories will be closed in places for days. In Galt, water ran four feet deep through the streets.

### Michigan Law Repealed

Famous Life - For - a - Pint Law is Revoked

Lansing, Mich.—Michigan has repealed its famous "life-for-a-pint" law. Governor Fred W. Green signed the Watson House bill eliminating 120 "minor" felonies from the list of crimes which draw the life penalty for fourth offences.

Governor Green said he would commute the life sentences of Mrs. Ella Mae Miller, Channie Tripp, Tony Papich and others who are serving life sentences for liquor felonies.

### Aviation Course By Mail

Boston.—Learning to fly, by mail, is now possible under a plan being carried out by the Massachusetts State Department of Education. Since the department's recent announcement that it would offer a correspondence course in aeronautics, more than 400 inquiries have been received from 23 states of the union, Canada and Haiti.

### Test Was Successful

Trenton, N.J.—Two passengers, one a woman, were safely dropped from the seat of an aeroplane at an altitude of 1,000 feet, at Mercer airport. The experiments, conducted by the manufacturers of the parachute, were designed to prove to a group of army and navy officers the feasibility of the "safety seat."

## Canada Takes Formal Action In Connection With The I'm Alone Case

Ottawa.—The sinking of the Canadian schooner "I'm Alone," by United States coast guard vessels has been the subject of formal representations by the government of Canada to the United States.

This was stated in the House of Commons by Right Hon. W. L. Mackenzie King, prime minister, answering a question by Hon. R. B. Bennett, Opposition leader.

Mr. King stated that the "I'm Alone" case had been the subject of correspondence between Ottawa and Washington for the past week. He also said that the correspondence in this case would be brought down in due course.

Washington.—Word from Ottawa that the Canadian Government had decided to make the sinking of the

### Express Confidence In Bracken Government

Labor Resolution Defeated 31 to 19 In Manitoba House

Winnipeg.—By a vote of 31 to 19, confidence in the Bracken Government was expressed by the Manitoba legislature, when a Labor resolution demanding an investigation of the Seven Sisters Falls power agreement by a committee of the House was defeated.

The issue had been regarded by the premier as one of want of confidence. John Queen, Labor leader, was the sponsor of the resolution.

In the division the government had the support of the Liberal members, including H. A. Robson, Liberal leader, Conservative, Independent and Labor members supported the Queen resolution.

When the session opened Premier Bracken and the leaders of the various groups paid tribute to the late Sir Hugh John Macdonald. By a standing vote, a resolution of sympathy was unanimously adopted.

### Serious Epidemic Of Meningitis In China

Steamship Officials Take Steps To Prevent Spread Of Disease To Other Countries

Shanghai, China.—The meningitis epidemic having reached serious proportions here officials of steamship lines have decided not to accept steerage passengers from Shanghai bound for Canada and the United States. The action was taken in an attempt to prevent the possible spread of disease to these countries.

Owing to lack of statistics accurate information of the number of cases was lacking but it was known to be large. In the Shanghai area authorities estimated, there were one thousand cases being treated. Many deaths have occurred within a radius of one hundred miles of Shanghai.

### To Meet At Saskatoon

Moose Jaw.—The next annual convention of the Saskatchewan Educational Association will be held at Saskatoon, and it is expected that at the same time the annual convention of the Saskatchewan Teachers' Alliance will be held in the same city. Official announcement of the decision to hold next year's conference in the northern city was made here.

### Valued At Four Billion

New York, N.Y.—Diamonds owned in the United States are valued at \$4,000,000,000, the Continental Insurance Company has found. The per capita value of the country's holdings is greater than that of any other country. Few of the world's large diamonds are owned in this country.

### Asking For Ship Tenders

Montreal.—Announcement was made here by officials of the Canadian National Steamships that tenders had been asked from Canadian and British shipbuilding firms for one, two or three steamships for the company's service between Vancouver, Prince Rupert and Alaska. The vessels will be 365 feet in length.

### Scholarships For Research Workers

Students Of Outstanding Merit Have Been Selected For Awards

Ottawa.—Sixty of the applicants for post-graduate scholarships from the national research council of Canada have been granted either fellowships, studentships or bursaries for 1929 according to announcement made by the scholarships committee of the council. Out of the hundred applications before the council those of outstanding merit have been selected for the awards.

The list contains names throughout the breadth of the Dominion and allows for the expenditure of approximately \$50,000 for research which will be followed at various Canadian universities.

The purpose of the annual endowment of individuals with money grants by the national research council is to assist in building up in Canada a corps of thoroughly trained research workers capable of undertaking and directing scientific research on Canadian industrial problems or in connection with the development of Canada's natural resources.

The scholarships go to university graduates who are following some line of scientific investigation at university laboratories.

### Long Pacific Hop Planned

Lieut. Harold Bromley Will Attempt Non-Stop Trip From Tacoma To Tokyo

Tacoma, Wash.—A non-stop solo trans-Pacific flight from Tacoma to Tokyo is to be made as soon as wind and weather conditions are favorable, was announced here by Lieutenant Harold Bromley, a native of Victoria, B.C., and a group of Tacoma capitalists who are backing his project.

Through the Tacoma chamber of commerce it was announced the financing had been chartered and purchase of the plane negotiated.

Bromley is confident of success. He believes, he said, that he has taken into consideration everything of safety to ensure success for his venture and safety for himself. The plane's one wing is situated below the fuselage rather than above and in case of motor failure he could dump all his gasoline in 15 seconds and float high above the hollow wings. The plane is entirely of wooden construction.

### Libel Action Costs Heavy

Toronto.—Taxation of the bill of costs, submitted by W. N. Tilley, K.C., counsel for Sir Arthur Currie, commander of the Canadian Corps in France during the great war, in his libel action has been made. The net costs allowed totalled \$5,377. The amount charged before taxation was \$11,087. In addition to this, defendants will have to pay judgment of \$500.

### Settlers For West

Halifax, N.S.—With from four weeks' to four months' training at various farm centres in England and Scotland to their credit a party of 110 British immigrants, bound for the grain fields of Canada, arrived here on the White Star liner "Doric." They later entrained for Winnipeg.

### RESIGNS IMPORTANT POST

Lord Lovat, who has now almost given up public life, has resigned from the chairmanship of the overseas settlement committee owing to ill-health. He resigned as parliamentary under-secretary for Dominion affairs last December.

### Making Tour Of Canada

League Of Nations Officer To Help In Membership Drive

Ottawa, Ont.—One of the highest officers of the League of Nations is a visitor in Canada. M. Joseph Avenol, Deputy Secretary General of the League, arrived in Vancouver from the Orient and will tour Canada from the Pacific to the Atlantic, speaking on behalf of world peace and the work accomplished by the League.

M. Avenol has been in China conferring with members of the Nationalist Government which has been formally recognized by the League as the de facto administration in that country. It is now a long time since Soviet Russia exercised any influence in the councils of Nationalist China, and M. Avenol expects to report to Geneva a great strengthening of Chinese co-operation with the League as a result of his visit.

The Deputy Secretary-General will be a speaker on behalf of the big coast-to-coast drive for new membership to be launched April 16 by the League of Nations society in Canada. The present membership of the League is 21,000 and it is expected this will be well over 50,000 on the completion of the membership campaign.

### Prince Reports For Duty

London, England.—Prince George, youngest son of the King, reported for duty at the foreign office April 3, and spent the morning in meeting his future colleagues. The prince, who has abandoned his career in the royal navy, is attached to the western department at the foreign office. The prince returned to Buckingham Palace for luncheon.

### Earl Of Balfour To Retire

London, England.—The Earl of Balfour has decided to sell his London house and settle in the country. Doctors advised him to take this step, which is generally construed to mean that the Earl of Balfour is quitting public life. His throat has been a persistent source of trouble.

## Divorces Granted In Foreign Countries May Not Hold Good Here

### Plan New Road To North

Railroad From Emerson To Fort Churchill Is Projected

Winnipeg.—Authority to build and operate a railroad from Emerson, Manitoba, to Fort Churchill, Man., on the east side of Lake Winnipeg, with additional powers to establish a steamship line to Churchill and to construct elevators, warehouses, wharves and terminals there, is asked in a petition read and received in the Manitoba legislature.

The petition is made by the Emerson-Churchill Promotion Company, Ltd., and nine others under the name of the Emerson-Churchill Colonization Railway Company.

Emerson is situated on the border between Manitoba and the state of Minnesota, about sixty miles south of Winnipeg. Churchill, the terminus of the Hudson Bay Railway, is approximately 1,000 miles north of Emerson.

The scheme presented to the legislature represents capital stock for \$5,000,000, the petition states, divided into fifty thousand shares of \$100 each, with provision that by order-in-council the stock may be increased to any amount not exceeding \$50,000,000.

It is planned to construct the railway from Emerson to Slave Falls, on the Winnipeg River, then northwesterly to intersect with the Hudson Bay railroad near Wabowden, thence northeasterly to Fort Churchill Harbor.

### Three Killed At Sudbury

Men Smothered By Fall Of Rock In Nickel Mine

Sudbury, Ont.—Caught in a slide of muck three men were smothered to death at the Leveack mine of the International Nickel Co., 20 miles west of here.

The men had gone on shift and were working on a rise along the foot wall between the fifth and seventh levels when a block of muck which had been blasted the previous evening gave way. The three men were hurled down a distance of 20 feet and buried in the falling muck. Two hours later rescuers recovered the bodies, which were brought here.

### Missing For Three Months

Boston.—The Boston Herald says that 17-year-old Rosamond Morse, daughter of Edward W. Morse, Jr., wealthy Brookline resident, has been strangely missing from home since the night of January 4. A nationwide search by private detectives and police has been unsuccessful.

### Advertising Man Dies

Winnipeg.—Robert James McPherson, 55, president of McPherson-McCurdy Advertising Agency, is dead after a year's illness. Born in Kincardine, Ont., he was educated first at Queen's and later at Manitoba University.

### Will Operate New Hotel

Toronto.—The Canadian Pacific Railway has agreed to operate the hotel to be erected in Guelph by Arthur W. Cutten, Chicago grain operator, according to E. W. Beatty, president of the railway, who is visiting Toronto.

## A. J. McPhail Tells U. S. Senate Committee About Wheat Pool Idea

Washington.—Not only has the Canada Wheat Pool been of distinct advantage to the wheat farmers of Canada and tended to increase the prices they have obtained for their product, but it has had an influence on the whole wheat market, according to A. J. McPhail, president of the Central Selling Agency for the great three Western Canadian pools, who discussed the subject before the Senate committee on agriculture here.

Mr. McPhail came before the Senate committee by special request of the chairman, Senator McNary. Not only was he warmly thanked by Senator McNary and others of the committee for consenting to be present, but senators expressed the view that the information which he set forth as to the workings of the Canada Wheat Pool would be of great use in evolving plans in this country for farm relief.

Not the least interesting phase of the hearing was the suggestion that this country and Canada by co-operating with respect to the marketing of exportable wheat could control the world market to a still greater degree than it has already been influenced by the Canadian Pool.

Senator Brookhart of Iowa, asked a series of questions of Mr. McPhail on this point. While Mr. McPhail made no commitment on the policy of such co-operation, he indicated that the Canadian Pool, working with some similar organization in this country, could have an increased influence on the world market.

Mr. McPhail gave a sketch of the history of the formation of the pools of Manitoba, Saskatchewan and Alberta, and their uniting in the formation of a central selling agency. Mr. McPhail declared that while the farmers of Western Canada in 1923 and earlier were anxious to have the government continue the wheat board plan, it is now the general feeling of the farmers that the pool has been of the utmost benefit in the creation of a spirit of independence and self-reliance among them as well as increased knowledge of their own business. He declared the success of the pool had been a great incentive to the general co-operative movement in Canada.

"The farmer," he said, "is taking more interest in his own organization. There is a keen individual sense of responsibility for the success of the organization."

He said the pool marketed 52 to 54 per cent. of the wheat of the three provinces and carried on a continual campaign of education among the farmers in order to increase the membership.

Members of the committee were interested to know that the Pool is financed wholly by the banks and not by the government, and that borrowings sometimes reach \$55,000,000.

Laurentian Spring

The photograph reproduced above is a purely amateur study, but it is a fine illustration of how the great Laurentian district north of Montreal lends itself to pictorial art. It is used by the Tourist Department of the Canadian Pacific Railway to lure the fisherman from his home as, although it does not demonstrate the piscatorial possibilities, it does show something of the great natural beauty which every true angler appreciates equally with opportunity to demonstrate his art.

# News Notes

Born—To Mr. and Mrs. Rulon Dahl a daughter.

BORN —TO Mr. and Mrs. L. McPhee a son.

Mrs. Jane Collet returned last week from Banff, where she has spent the last few months with her son, E. S. Duncan, editor of the Crag and Canyon newspaper.

Do not fail to visit the Broadway Store during their One Day Sale of shoes which is being held Saturday April 13th. Read their advertisement elsewhere in this issue.

Mr. Ray Knight returned last Saturday from a visit to Salt Lake City. He was accompanied on the return trip by his son Jesse.

A surprise party was held in honor of Mrs. Ada O'Brien last Monday night. Twelve guests sat down to a daintily served luncheon.

A shower was held Wednesday afternoon at the home of Mrs. Albert Ralph in honor of Mrs. Vern Nell (nee Miss Luella Mehew) a large crowd was in attendance and the bride received many beautiful presents.

Marion Palmer, who for the past 15 years has operated a farm near Blackie, Alberta is in Raymond looking over the district with a view to buying property here.

## At the S. of A.

The old R. S. A. is rather a lonesome place at present with all the students away, but we are all looking forward to seeing them from time to time. We are starting preparation for the summer reunion when all of them will be back.

Wes Smith B. Sc. Instructor in Field Husbandry will have charge of the weed work for the Raymond district. We are very glad that Wes is making the school his headquarters as he is a real live-wire and we can't afford to lose him even for the summer.

Mr. Smitten, Labor Commissioner for the province was a school visitor last week. Mr. Smitten was down in the interest of the Sugar Beet growers and assured them that there would be an abundant supply of labor for the beet crop. Principal O. S. Longman accompanied Mr. Smitten around the district.

We have been fortunate in wintering a few of the Chinese Ring Neck Pheasants around our grounds this winter. These birds are very tame and have been seen down as far as Broadway so consequently would be easy prey to anyone bent on destroying. We would kindly ask every one to co-operate with us in trying to preserve these birds so we can have a start to stock the Raymond district.

### CHAPTER XVII.—Continued

Donald turned to Wainwright. "Are you going to let her run? Is it safe for her to enter a race with all these men?"

"I couldn't stop her now, and besides," he added with a touch of pride, "she can hold her own with any of them."

The old trapper made his way to Donald's side. His leathery old face, with its multitudinous wrinkles, wore a perturbed expression. "That feller Lafonte is cutus. He's full of dirty tricks; 'tain't safe for Connie to ride."

Donald turned anxiously to Wainwright.

Connie's father shook his head. "I am afraid it is too late now." Then in a lower voice he added: "You must know the reason for her entering this race."

Donald looked puzzled for a instant. Suddenly it dawned on him. "The purse?"

Wainwright nodded. "It would break her heart if I forbade her to ride, now that she has gone this far. She must have decided suddenly, as she never mentioned it to me."

The Rennie Company had put up a purse of two hundred and fifty dollars. There was to be a collection taken after the race to add to this purse.

The horses trotted down the course, Connie's was rearing and prancing, and it was with difficulty that she managed to get him to join the others. She leaned forward to whisper words of quieting in his twitching ears. Down the course they came. They were in nice alignment as they passed the judges' stand.

"Go!"

Connie on her spotted cayuse showed a bright splash of colour in the midst of her darker competitors.

Lafonte's dark face lighted with a savage gleam as he swung his horse to the inside or "pole."

Running neck and neck with him was his hated rival, Paul John, leaning low on his horse's neck and shouting unintelligibly in Chinook. Connie was with the stragglers five lengths in the rear. This was new to Pegasus, and he was bewildered by the crowding horses about him. As they turned the corner of the course, Lafonte's horse stumbled, and before he righted Paul John had slipped into the lead. Cursing wildly, Lafonte settled himself in the saddle, his horse's head at the flank of his rival.

Hundreds of times Pegasus had travelled this field with Connie clinging to his back, slowing up for shrubs and trees and making sudden

bursts of speed in the open. That had been vastly different to being surrounded by running horses and listening to the wild cries of their riders and the roaring of the excited crowd.

At the moment Lafonte lost the point of vantage to his rival, Connie leaned forward and emitted a peculiar clucking sound at the same time striking her moccasined feet into the horse's sides. Pegasus's ears twitched back at the sound of the voice he loved.

"Now I know what you want," he seemed to say, as his beautiful neck stretched out and his hoofs spurned the ground. His graceful body lowered until it appeared to the spectators as though he were just skimming the earth. He moved with a springy stride, the muscles of his sinewy frame working with a sliding movement beneath the glossy skin. Gradually he drew away from the horses travelling with him. Foot by foot he crawled upon the leaders.

The party in the judges' stand came to their feet to shout approval. The girls were cheering wildly for Connie as she crept nearer the front.

Donald was leaning forward with flushed face, his eyes glued to the spotted cayuse, a deep admiration in his heart for the intrepid little rider. Little Andy jumped on the rail. "Strike me pink!" he yelled, "look at that 'oss run!" His eyes were bright with excitement. "A 'undred dollars on the spotted 'oss!" he shouted hysterically.

"I'll take you," said a voice.

"Ere you are, mate; let's minko 'er two 'undred. I'm for me 'ome girl. She saved me hluikin' life, God bless 'er!"

As they neared one of the corduroy bridges Connie was neck and neck with Lafonte. The latter glanced up as Pegasus came opposite. The roar of the crowd came dimly to Connie's ears above the swish of air and the rumble of hoofs as they struck the culvert. An evil look crossed the half-breed's face. He swung his horse sharply to the right. Connie's horse floundered. Struggling to right himself, he fell off the bridge and landed with a dull thud on the soft ground below. The forward motion of the cayuse had stopped so suddenly that Connie was thrown like a projectile to a clump of bushes fifteen feet distant.

For an instant the big crowd was paralyzed. Then there went up a great groan of horror. The old trapper came to his feet, his eyes flaming, a hectic flush on his cheeks. Like a flash his hand flew to his six-shooter, and the long-barreled Colt was trained on Lafonte. As he pulled the trigger Douglas struck his arm and the bullet sped harmlessly over the horseman's head.

"My God!"

The words whistled through the set teeth of big Jack Gillis. "Let me get at him!" he cried hoarsely, as, pale of face, he struggled through the crowd. He would have thrown himself in front of the oncoming rider if strong hands had not clutched and held him. Connie's father fell

back a step as if struck a sudden blow, his eyes wide and staring. Andy's head fell forward, and he groaned aloud. Janet covered her face with her hands and sat down wearily.

Donald leaned from the judges' stand, his face pale as death. A vision of Connie's broken body came before his eyes. "Oh, God!" he cried aloud in a voice vibrant with pain. He covered his eyes as though in dread of looking at the spot where she had fallen.

A shout came from the crowd—then a cheer that seemed to rock the hills. "Look! look!" they shouted.

Donald's heart was beating tumultuously. Could he believe his eyes? Connie was standing upright. She appeared to sway slightly; then, like a flash, she was at her horse's head. Trembling and snorting, Pegasus came to his feet. With a bound she was on his back and seized the reins. Pegasus reared like a stag and was off down the course at the tail end of the race.

As Connie passed the judges' stand she was well up with the tail-riders and gaining steadily. Her face was pale and tense. A smear of red showed on her arm, and a little stream of blood trickled down her forehead from the wound invisible in the thickness of her hair.

The crowd became suddenly quiet as Connie thundered past—a silent tribute to her glorious pluck. But as she crept toward her original position they roared their applause. Pegasus was showing an endurance and speed that had never been equalled in all of that district. As they turned to come down the home-stretch Connie was a good fifty yards behind the leaders. Lafonte's wiry cayuse was again in the lead by a few feet.

The shock and strain were beginning to tell on Connie. She leaned forward and in a broken, trembling voice she cried: "Oh, Peggy! Win, Peggy! Please! Please! I don't want to lose! I've got to win! Go! Go!" She was sobbing hysterically now, and her small hands were patting the horse's neck.

Pegasus had never heard that tone of supplication in the sweet voice of his mistress before. Nobly he responded to the call. She felt his body lower under her as he sat himself to the herculean task of overcoming his rivals' enormous lead.

Lafonte was using the whip. Paul John, hanging so persistently to his flank, angered him. They thundered across the corduroy, and at the sound of Pegasus's hoofs on the cedar poles Lafonte turned to glance behind. A look of astonishment crossed his face as he saw the golden-haired rider so close. With a curse he struck his horse a brutal blow that caused the animal to lose its stride momentarily and fall back in line with Paul John.

Slowly, but surely, Connie's spotted cayuse was closing the gap between himself and the two leaders, sweeping along at a terrific pace, his body and limbs moving with the rhythmic grace of a thoroughbred. Connie was leaning so low that the heavy white mane of her horse was brushing her face. Her hair was streaming in the wind like fine-spun gold. The party in the judges' stand rushed to the railing, leaning anxiously forward to get a glimpse of the running horses as they turned the corner, and cheered lustily as the three riders thundered over the small bridge and came toward the finishing line. Connie was at Lafonte's flank now.

Pegasus's remarkable speed fanned the spectators' excitement to a fever heat. Andy had done so much shouting that his voice was reduced to a whisper. Standing on the top rail, his arms waving, he was shouting huskily, "Come on, Connie! Come on, Connie!"

Donald's dark eyes were glowing as he watched the slender figure clinging to the flying horse's bare back. "What a pity if she loses," he said under his breath. Leaping to the rail, he joined in the shouts of encouragement to the straining Pegasus.

With one hundred yards to go, Connie uttered one last appeal to her flying steed. Above the drumming of hoofs the spectators heard her voice ring in passionate entreaty. "Now, Peg! Now! Go! Go!"

With nostrils distended, his breath coming in choking gasps, his eyes bulging, and the voice of his adored mistress ringing in his ears, the gallant animal with a burst of speed that made the onlookers marvel, ranged himself alongside his labouring rivals.

Ten yards from the finish—five yards—they were neck and neck. Then, summoning his last ounce of strength, Pegasus leaped forward as though he would annihilate time and distance. With eyes nearly blinded with dirt tears and the roaring air,

VAPORUB  
Over 21 Million Jars Used Yearly

Connie saw Pegasus hurl himself past the winning post—a winner by half a length!

The ear-splitting roar that went up from the race-mad crowd must have caused the marmots on the slides near the distant glaciers to seek their holes in terror. A flock of mallard ducks, which had floated peacefully near the centre of the placid lake throughout the day's commotion, rose with frightened cries to seek a more secluded spot in which to finish their afternoon's siesta.

The crowd had seemingly gone mad. The atmosphere pulsated with a wild tumult of sound. Hats were thrown in air and throats were strained with shouting.

Donald found himself with his arms about Andy, dancing and cheering in a frenzy of joy.

(To Be Continued.)

### Airplane Perfection

Almost Complete Extinction Of Mechanical Error In Construction

The human factor is now of paramount importance in aviation in all its branches in Canada, according to officials of the government who point to the almost complete extinction of mechanical error in the construction of aircraft in the Dominion during the past year.

In the earlier days of aviation in Canada, frequent accidents were attributable to engine failure, faulty construction and defective parts. Last year only one airplane accident could be blamed in any way on a defect in either machine or engine.

"It is now time for our pilots to devote themselves most earnestly to perfecting their flying," an official said. "If the personnel operating aircraft do their part as the air engineers have already done theirs, we will rarely hear of aircraft accidents."

### Hardly Likely

A young man was being questioned by a life insurance official about his family's health. He was asked: "Of what did your grandfather die?"

The applicant hesitated a few moments, and then stammered out:—"I'm not sure, but I think he died in infaney."

Mindard's Liniment for the Grippo and Flu.

"Jack wanted to know if I believed in elopements."

"That was rather a leading question. What did you say?"

"I told him I wouldn't even let my imagination run away with me."

More than 90,000,000 incandescent lamps were made in Germany in the past 12 months.

### Tribe Of American

#### Indians In Siberia

Soviet Officials Hope To Save Them From Extinction

Efforts are being made by the authorities to save from extinction a nomadic tribe of "American Indians" in Siberia which has already dwindled to 403 persons.

The tribe, known as Karagas, was discovered some years ago in the Turun district of Siberia. In appearance, language, and customs they resemble so closely the Red Indians of North America that leading Russian anthropologists were convinced of their American origin.

A recent investigator reports that the tribe has such a high death rate that it has only a few more generations of life. The government has therefore set aside a large tract where no other tribes will be permitted to hunt. It is hoped here that these exclusive "happy hunting grounds" will increase the material prosperity and in consequence the longevity of the Karagas. A hospital has also been established for their use.

Perhaps the most extraordinary single fact reported about these "strayed" Indians is that crime is entirely unknown among them. It is said that they have never heard of murder or theft.

### Little Helps For This Week

"So then every one of us shall give account of himself to God."—Rom. xiv. 12.

God bends from out the deep, and says,  
"I gave thee the great gift of life; Wast thou not called in many ways? Are not my heaven and earth at strife?"

I gave thee of my seed to sow;  
Bringest thou Mo thy hundred-fold?"

Can I look up with face aglow  
And answer, "Father, here is gold?"

—James Russell Lowell.

We are not our own, but His; and we are to live according to His commandment. Whatever we bury out of sight we must account for.—N. L. Frothingham.

With so thorough a preparation at hand as Miller's Worm Powders the mother who allows her children to suffer from the ravages of worms is unwise and culpably careless. A child subjected to the attacks of worms is always unhealthy, and will be stunted in its growth. It is a merciful act to rid it of these destructive parasites, especially when it can be done without difficulty.

### Canadian Industries

A recent survey of Canadian industries shows 6,500 groups of articles fully or partly manufactured in the Dominion, while approximately 1,600 Canadian firms or corporations are active exporters.

The new underground railway station at Piccadilly Circus, London, was officially opened on December 10, 1923.

### Millions For Roads

British Columbia Has a Very Ambitious Programme For This Year

This year's program of road construction in the province of British Columbia calls for an expenditure of \$7,100,000. A further sum of \$2,500,000 is to be spent for maintenance of highways and roads, and \$1,000,000 has been voted by the provincial government for the construction, reconstruction and permanent improvement of trails and bridges required as access to the more important mineral areas within the province.

## WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100 % Sunlight Send for booklet "WINDOLITE"

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from this point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passages of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, and that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

## FLU Germs Breed In the Throat.

First: Appear As A Common Cold, But Gain Tremendous Headway In Six Hours

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerviline. Half a teaspoonful of Nerviline in water makes a most efficient gargle. The germ-killing properties of Nerviline quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure to rub the neck and chest with Nerviline. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding germs. This combination treatment of Nerviline and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

## News Notes

Considerable excitement was created about town last Saturday afternoon when a shot coming from the Canadian Bank of Commerce, passed through the bank window and thru the window in the apartment of Harold King in the upper storey of the Security Block. On investigation it was found that Mr. John Yoman, a member of the staff was handling a 38 Iver Johnson revolver belonging in the office when it accidentally discharged. Mrs. Harold King was scrubbing the floor near the window when the shot passed through only a few feet above her head.

The British American Oil Company Limited are building two large supply tanks just west of the stock yards. These tanks will be used as a base from which gasoline, kerosene, oils and greases will be distributed to consumers in the district by truck. Mehev Bros. are handling the trucking service. Construction on the sheds are almost completed and the tanks are expected here daily.

### PURDY TO HANDLE POOL ELEVATORS

R. D. Purdy, Manager of the Alberta Wheat Pool, in addition to his present duties has been appointed manager of the Alberta Pool Elevators. It is announced from the Pool head office in Calgary. Mr. Purdy's appointment fills the vacancy created by the retirement of C. M. Hall who has occupied this position for the past 2 1/2 years. T. E. Oliver, in addition to his present duties as assistant manager of the Alberta Wheat Pool. These appointments bring all the departments of the Pool, including the elevator system, under one central management.

### MRS. D. L. GILBERT, A. T. C. M. HOLDS ANNUAL RECITAL.

Mrs. D. L. Gilbert A. T. C. M. held the annual recital of her pupils at her home last Saturday afternoon. The young artists gave a very pleasing and creditable performance. After the musical a lunch was served. About twenty were present.

### BRITISH BOYS ARRIVE FOR FARM TRAINING

The first group of British boys, forty in number, coming to Alberta during the present season under the arrangement between the Provincial Government and Overseas Settlement Board arrived in the province during the past week. They have been equally divided between the schools of agriculture at Vermillion and Olds where they are being given a months practical training in Canadian agriculture methods which will fit them for work on farms in the province. At the conclusion of their month's course another similar group is expected to arrive and following this two groups of British young women will come forward at intervals of a month for courses of training in practical home economies before being placed as domestic farm help.

Miss Ora Hicken has accepted the position of Marcellist at the Rex Barber Shop. Miss Hicken has just completed a course in this art at Calgary.

Last weeks issue of the Recorder stated that Miss Coleman, of Magrath winner of Gleaner Girls speech in the M. I. A. contest received a special prize of a handsome set of books donated by H. Hironaka, local Japanese farmer. This was not correct inasmuch as the books were donated by Paul Nakamura, well known local Japanese and not by Mr. Hironaka.

Mr. Gus Nordblad, a farmer located between here and Lethbridge, recently shipped a small quantity of wheat to Sweden to be used for experimental purposes in that country. The wheat was Marquis.
